

Lag – the time it takes a system to respond to change

Laminating – gluing together thin strips of material to make a thicker one

Laser cutting – using high powered lasers to cut materials

LDR – light dependent resistor

LED – light emitting diode

Lever – a rod pivoted along its length

Linear – a straight line

Load – the forces acting on a structure

Logic – representing signals at 0 or 1 states

Low – a 0 logic state, no voltage present
